Re: Dartmouth Hitchcock Medical Center - Building Six

Dear Larry,

I wanted to thank you for the tremendous effort put forth by Trumbull-Nelson during the construction of the above referenced building. Your companies effort was a major factor in completing the project on-time and with a very satisfied owner. Trumbull-Nelson's ability to assemble a large crew and maintain that manpower during the last couple of months of the project, became the driving force that pushed all trades through to an "on-time" completion.

It was not only the size of the crew, but the quality of the work performed by that crew. From top to bottom, all T-N personnel that I dealt with were top quality people. The tremendous effort from Bruce Summarsell, Steve Rollins and Henry Fuller was greatly appreciated. Through teamwork and effort, they took a difficult challenge and turned it into a success.

Hopefully, we will have the opportunity to work together again.

Sincerely,

Tom Felton
Project Manager
